The following information outlines the technical requirements of Synthesis. We appreciate the assistance of the facility management in providing the best your facility can offer.

- Load-in** Please have the required set-up completed, as specified in the diagram, when we arrive. We require a minimum of two hours load-in and set-up time before the house is opened for theater patrons.
- Sound** Synthesis travels with a full sound system, but may require access to house speakers from our mixing console. Please have someone in the hall who can accommodate such a connection.
- Cords** Outlets are necessary for the electrical instruments as specified in the diagram.
- Lighting** Sufficient lighting in order for 20 musicians and instruments to be well lit and visible to the audience.
- Piano** A recently tuned grand or baby grand piano is preferred. However, if no piano is available, we travel with an electronic keyboard.
- Stage** The stage should be 30' wide by 24' deep and large enough to accommodate the setup shown on the attached diagram. Risers are requested for the brass section (16' wide x 12' deep x 16" tall). 20 chairs should also be provided.
- Load-out** A minimum of one hour for strike and load-out time is required.
- Diagram** The preferred set-up is outlined in the diagram on the back of the page.

Please send the *Performance Site Questionnaire*, floor plan, and any additional facility information available to Performing Arts Management.
